SUMMARY

Frontend Engineer with 3+ years of experience specializing in React and TypeScript, building high-performance interfaces with Next.js App Router, Server Components, and Server Actions. Proven leadership in sprint management and delivery of scalable, AI-powered web applications, with hands-on ownership of testing, observability, and CI/CD across the full development lifecycle. Passionate about component-driven architecture, design systems, and building high-performance user interfaces.

- 3+ years building scalable, production-grade web applications with React, TypeScript, and Next.js (App Router, Server Actions, RSC, Concurrent Features).
- Promoted to Engineer at Virtusa; appointed Frontend Sprint Lead overseeing a 3-person team across sprint planning, code reviews, and cross-functional feature delivery.
- Architected the frontend of a greenfield AI agent orchestration platform, delivering a reusable component library, real-time monitoring dashboards, and a 35% Lighthouse performance gain.
- Focused on component-driven architecture, design systems, unit/integration/E2E testing, observability, and scalable frontend infrastructure.

TECHNICAL SKILLS

Core Frameworks: React (Concurrent Features, Server Components), Next.js (App Router, Server Actions, RSC), TypeScript, JavaScript

State Management: Redux Toolkit, Zustand, TanStack Query (React Query), Context API

UI & Styling: Tailwind CSS, Shadcn/ui, Material-UI (MUI), CSS Modules/Styled Components, Storybook

Frontend: GraphQL, REST APIs, Micro Frontends, Component-Driven Architecture, React Native, React Hook Form, UI/UX Implementation

Build & Performance: Vite, Webpack, Turbopack, SWC/esbuild, Lazy Loading, Code Splitting, Memoization, Bundle Optimization, API Caching, Debounce/Throttle, Virtualization, Lighthouse CI

Testing & Quality: Vitest, Jest, React Testing Library, Playwright, Unit/Integration/E2E Testing, Storybook

Code Quality & DevOps: ESLint, Prettier, Husky, lint-staged, SonarQube, Git (GitHub/GitLab), CI/CD (GitHub Actions, GitLab CI)

Infrastructure: AWS, Docker, Kubernetes

Backend & Databases: Node.js, Express, Spring Boot, MongoDB, MySQL, Supabase, Firebase

Practices: Agile/Scrum, Sprint Leadership, Cross-functional Collaboration, Technical Code Review, Mentorship, Responsive Design, Cross-browser Compatibility, WCAG/a11y

WORK EXPERIENCE

Engineer & Frontend Sprint Lead

Virtusa Consulting Services · Jan 2024 – Present

- Appointed Frontend Sprint Lead for a 3-person team, assigned tasks, conducted peer code reviews, and held final sign-off authority on all frontend feature releases.
- Sole frontend owner across 3+ consecutive high-velocity sprint cycles, scoped, built, and shipped all UI deliverables on schedule with zero escalations to senior engineers.

Helio Foundation — AI Agent Orchestration Platform

React.js, TypeScript, Tailwind CSS, GraphQL, React Hook Form · 35% Lighthouse gain, 30% faster feature dev

- Architected the greenfield frontend from inception across 5+ core modules, defining component structure, design system, and frontend standards for a platform Virtusa pitches to enterprise clients.
- Engineered a comprehensive reusable UI component library (cards, accordions, tabs, dashboards, profile pages), reducing new feature development time by ~30% and onboarding time for new engineers.
- Built a custom multi-step form system with dynamic field rendering and state management via React Hook Form; delivered 4+ real-time data visualizations (line charts, stacked bar graphs) monitoring AI agents, MCP servers, and RAG corpora.
- Applied lazy loading, memoization, API caching, debouncing, and code splitting, improving Lighthouse initial load score by ~35% and reducing bundle size.

Internal Enterprise Tooling (Lumos & Helio Build)

React.js, Tailwind CSS, MongoDB · 25% faster delivery, 20% fewer bugs

- Implemented a hierarchical 3-tier project management UI (Lumos) with tree-based navigation, dynamic modals, and client-side PDF export, reducing manual data entry errors by ~15% and eliminating a recurring support request category.
- Engineered a scalable navigation system (Helio Build) using reusable layout components and a service-based API architecture, cutting new-page development time by ~25% per sprint cycle.
- Refactored component architecture across 2 legacy product modules, achieving ~20% improvement in Lighthouse performance scores and reducing the active UI bug backlog by 20%.

Associate Engineer Intern

Virtusa Consulting Services · Mar 2023 – Dec 2023

- Developed React.js frontend features and reusable UI components during a structured pre-joining internship, contributing to a ~20% reduction in recurring UI defects.
- Selected as one of ~10 interns from a large cohort for a full-time Engineer offer, based on consistent on-time delivery and quality of technical contributions.

Freelance Web Developer

4 Clients — Education, Logistics & Services · Aug 2021 – Jan 2024

- Led a 3-person team to scope, wireframe, and deliver full-stack web applications for clients across education and logistics verticals.
- Personally handled Figma prototyping and built production-ready frontends for all 4 clients using React.js, Sanity.io CMS, and Firebase, delivering CMS, real-time data sync, and fully responsive layouts on schedule.

PERSONAL PROJECTS & OPEN SOURCE

JTracker · npm: @chaithanya-kumar-katta/jtracker

Node.js, @inquirer/prompts, chalk, cli-table3

- Published a local, offline-first CLI ticket tracker for developers needing lightweight sprint and issue management without cloud dependencies or complex setup.
- Persists data to `~/jtracker/data.json` with interactive prompts, color-coded output, and tabular analytics views.

README Forge

JavaScript, Node.js, GitHub REST API, Gemini/OpenAI APIs

- AI-powered documentation engine that parses GitHub repository trees and automatically generates structured, production-quality README files.

Feather UI · Live Demo Available

React.js, TypeScript, Tailwind CSS

- Reusable React component library focused on clean design, accessibility, and developer experience — built following strict component-driven architecture best practices.

EDUCATION

B.Tech in Computer Science Engineering

Guru Nanak Institute of Technology, Hyderabad · 2020 – 2023

CERTIFICATIONS

Oracle Certified Associate — Java SE 8 Programmer · Oracle University, 2023
